

SilhouetteELAR4 (MacOS) Compatibility Mode

If you are using an M1 or newer Mac, you will need to set use the MacOS compatibility settings to force SilhouetteELAR4 to “Open using Rosetta”:

1. Locate your SilhouetteELAR4 icon on your desktop, click it ONCE and select File >>> Get Info from the top menu bar.
2. In the File Info window, select *Open using Rosetta*.
3. Close the File Info window and you are done.
