

SilhouetteELAR4 (Windows) Compatibility Mode

On some Windows 10 computers SilhouetteELAR4 may suddenly act strangely. For example, it may crash suddenly when exiting from Student Report back to the opening window. If this happens to you then you should set SilhouetteELAR4 to Compatibility Mode:

1. Locate your SilhouetteELAR4 icon on your desktop, right-click on it and select *Properties* from the menu.
2. Select the *Compatibility* tab and then check the two boxes as shown in this screenshot. Ensure that the compatibility mode is set for *Windows 8*.
3. Click on *OK* and you are done.
