To update the program:

1. Click on the Update button. SilhouetteELAR will get information about the update and display it in the Update window.
2. Click on the Download button. SilhouetteELAR will download the update file.
3. Click on NEXT when the download is complete. The SilhouetteELAR installer will open.
Note: Sometimes the installer program opens behind another open window on your desktop. If you cannot see it, try closing or minimizing the open window.
4. Follow the on-screen instructions by clicking the **Unpack Update File** button and then the **Update Silhouette** button. The update only takes a few seconds. When it is done, click OK and the updated version of SilhouetteELAR will open.
