

# **How to change the path to save your SilhouetteELAR4 files to your VSB OneDrive folder (MacOS)**

By default, student report files are saved on your computer. However, you may wish to temporarily change that default to your **VSB OneDrive folder**.

(Yes, saving onto a USB stick is possible but not recommended. Your VSB OneDrive folder is much more secure.)

# The SilhouetteELAR4 default path

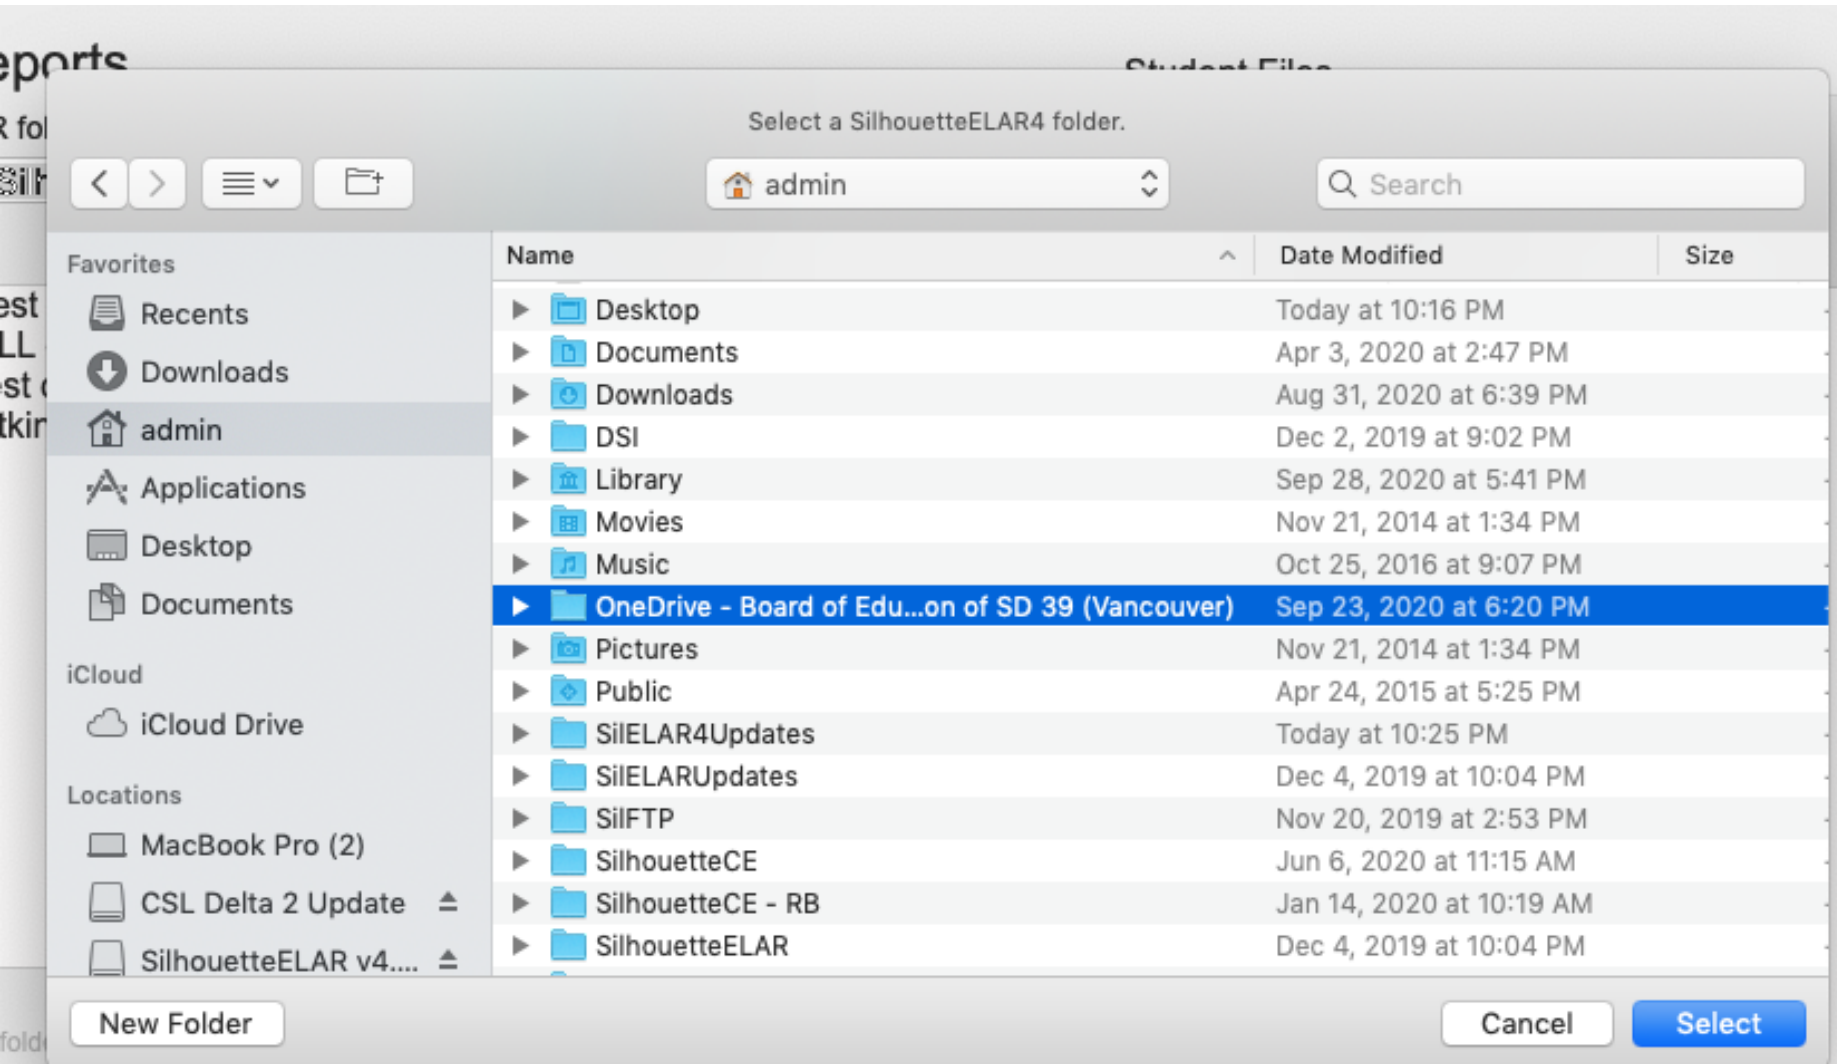

By default, SilhouetteELAR4 saves to a SilhouetteELAR4 folder inside your Users folder.

If you would rather save to your VSB OneDrive folder then:

1. Click on the **Browse** button.

2. In the window that the Browse button brings forward, click on **OneDrive – Board of Education of SD 39 (Vancouver)**. Then click on the **Select** button.

*Note: Yes, the instruction at the top of the window does say to **Select a SilhouetteELAR4 folder**, but the software will find the correct folder if you just select your OneDrive.*

The change of path to your VSB OneDrive folder remains in effect until you exit SilhouetteELAR4. When you next run the software you will have to **Browse** to set your OneDrive path again.
